WORK EXPERIENCE

QIRAT: Algeria - Mobile App Developer - 09/2024 - Present

An Algerian startup building [Sofa](#), a new video streaming platform for web and mobile.

- Converted Figma designs into responsive Flutter applications, implemented cross-platform features using Provider and REST API integration, and deployed the app to the Play Store.
- Built Sofa TV, a cross-platform video streaming app with tailored interfaces for mobile, tablet, and Android TV using Flutter. Integrated remote navigation, Google Cast, subtitle support, and adaptive video quality.
- Reduced data load time from 8–10s to under 1s, improving performance by over 80%.
- Managed version control and collaboration using Git and GitHub.

MSD CONSULTING: Algeria - Mobile Application Developer - 12/2022 - Present

MSD Consulting is a French team dedicated to creating custom app solutions for logistics, e-commerce, and job marketplaces.

- Developed Azougui, a grocery shopping app for the Mauritanian market with real-time inventory and multi-vendor support, released on both [Play Store](#) and [App Store](#).
- Built and maintained multiple Flutter apps ([Snay3i](#), [Mziya](#), [Laffaiire](#), [Laffaiire-tech](#)), all released on the Play Store, using Firebase and Provider for cross-platform development.
- Integrated Firebase services including Realtime Database, Authentication, Cloud Functions, Messaging, Analytics, and Remote Config to enhance functionality and user engagement.
- Cut Stripe fees by switching from Express to Standard accounts, saving 100% of monthly costs.
- Worked remotely with flexible hours, managing full app cycles from Figma designs to deployment.

INTAJ MOHTAWAYAT: Algeria - Mobile Application Developer - 02/2024 - 09/2024

A multinational company creating apps and websites for local and global markets in entertainment, education, and event management.

- Enhanced stability and performance of Smart Panda and Ramadan Awards applications.
- Developed D-Futures event management app using Flutter, MVVM architecture, Provider, and RESTful APIs.
- Mentored junior developers on best practices while collaborating with cross-functional teams for quality assurance.

SARL MCI: Algeria - Mobile Application Developer - 04/2023 - 12/2023

A real estate company specializing in tender, stock, and workforce management.

- Led Flutter app development for product and stock management with efficient Get-X state management, REST API integration and GitHub for version control.

EDUCATION

[Faculty of New Technologies NTIC, University Abdelhamid Mehri Constantine 2](#)

Master in Computer Science and Programming

Sep 2016 - Jun 2022 - Constantine - Algeria

TECHNOLOGIES

Stack

Flutter, Dart, Firebase (Realtime Database, Authentication, Cloud Functions, Cloud Storage, Messaging, Crashlytics, Analytics, Remote Config), REST API integration, Git, GitHub, GetX, Provider, Flutter Flavors, App Deployment (Play Store, App Store), Stripe, Google Cast, Remote control navigation, Adaptive video streaming, Figma-to-Flutter, Cross-platform development (Android, iOS, Android TV), Performance optimization.

Other

Android, Kotlin, React, Google Cloud Platform (GCP), Windows, MacOS, Linux, Xcode, Android Studio, VS Code

Achievements

Developed multiple personal side projects (e.g., [E-commerce-shop-app](#), [Multi-Store-App](#)) on GitHub
