WORK EXPERIENCE

Mobile App Developer

Algeria (Remote)

Amaya_AG

11/2025 - PRESENT

An aggrotech platform providing digital tools for farm and land management.

- Designed and implemented offline-first map navigation using GeoJSON and MBTiles, enabling full app usability in low-connectivity rural areas.
- Generated multiple zoom levels to enable smooth offline navigation.
- Implemented a new design system across the app, resolving production bugs and improving stability and maintainability.

Skills: Offline Maps, GeoJSON, MBTiles, Spatial Data, Code Refactor, Bug Fixing, Performance Tuning, Data Caching.

Mobile App Developer

Algeria

QIRAT

09/2024 - 10/2025

An Algerian startup building [Sofa](#), a new video streaming platform for web and mobile.

- Led Flutter development for Sofa, a cross-platform video streaming app launched on the Play Store.
- Built and maintained streaming features across Android, iOS, and Android TV, including Google Cast, subtitles, and adaptive video quality.
- Extended the platform to Android TV with optimized layouts and remote navigation support.
- Reduced initial data load time from 8–10 seconds to under 1 second by optimizing API calls and implementing caching.
- Collaborated with designers and backend teams to deliver responsive UI from Figma to production.

Skills: Flutter UI, Provider, REST APIs, Video Streaming, Android TV, Google Cast, Subtitles, Load Optimization.

Mobile App Developer

MSD CONSULTING

12/2022 - 08/2025

MSD Consulting is a French team dedicated to creating custom app solutions for logistics, e-commerce, and job marketplaces.

- Developed Azougui, a grocery shopping app for the Mauritanian market with real-time inventory and multi-vendor support, released on both [Play Store](#) and [App Store](#).
- Built and maintained multiple Flutter apps ([Snay3i](#), [Mziya](#), [Laffaire](#), [Laffaire-tech](#)), all released on the Play Store, using Firebase and Provider for cross-platform development.
- Integrated Firebase services including Realtime Database, Authentication, Cloud Functions, Cloud Storage, Messaging, Analytics, Crashlytics and Remote Config to enhance functionality and user engagement.
- Cut Stripe fees by switching from Express to Standard accounts, saving 100% of monthly costs.

TECHNOLOGIES

Skills

Flutter, Dart, Firebase Integration, REST APIs, State Management (Provider, GetX), App Deployment, Play Store Release, App Store Release, Stripe Payments, Google Cast, Android TV, Remote Navigation, Adaptive Streaming, Offline Maps, GeoJSON, MBTiles, Figma to Flutter, Cross-Platform Development, Performance Optimization

Other

Android, Kotlin, Firebase Cloud Functions, Push Notifications, Git, GitHub, CI/CD Basics, Linux, macOS, Windows, Xcode, Android Studio, VS Code, Raspberry Pi, ROS

STRENGTHS

Problem Solving

Strong analytical mindset with the ability to break down complex technical problems into practical solutions.

LANGUAGES

English Advanced

French Intermediate

Arabic Native

- Managed full mobile development lifecycles remotely, from Figma designs and API integration to deployment and store releases.

Skills: Firebase Integration, User Authentication, Cloud Functions, Push Notifications, Play Store Release, App Store Release, Stripe Payments.

Mobile App Developer

INTAJ MOHTAWAYAT

Algeria

02/2024 - 09/2024

A multinational company creates apps and websites for local and global markets in entertainment, education, and event management.

- Enhanced stability and performance of Smart Panda and Ramadan Awards applications.
- Developed D-Futures event management app using Flutter, MVVM architecture, Provider, and RESTful APIs.
- Mentored junior developers on best practices while collaborating with cross-functional teams for quality assurance.

Skills: MVVM, Clean Architecture, API Integration, App Stability, Code Review, Mentoring.

Mobile App Developer

SARL MCI

Algeria

04/2023 - 12/2023

A real estate company specializing in tender, stock, and workforce management.

- Led Flutter app development for product and stock management with efficient Get-X state management, REST API integration and GitHub for version control.

Skills: GetX, State Control.

EDUCATION

Faculty of New Technologies NTIC, University Abdelhamid Mehri Constantine 2
Algeria, Constantine
2016 - 2022

Masters in computer science and Programming

Autonomous RC Car (Graduation Project — Embedded / Robotics System (2022)

Developed a self-driving RC car capable of path following and obstacle avoidance using Raspberry Pi and ROS. Implemented real-time decision logic in C++ and integrated Lidar, ultrasonic, and infrared sensors under Linux.

Skills: Robotics, ROS, C++, Sensor Fusion, Embedded Linux, Raspberry Pi.
