PROFESSIONAL SUMMARY

Mobile App Developer with 3+ years of experience in Flutter and Android, skilled in building user-friendly, high-performance apps using Flutter, Dart, Firebase, BLoC, Riverpod, Provider, GetX, MVVM, Clean Architecture, REST APIs, and Git. Shipped 10+ apps to both the Play Store and App Store — including a video streaming app with 10k+ downloads, an agrotech platform with offline-first maps and a design system built from scratch, a Quran habit app with real-time community features, and multiple e-commerce and marketplace apps. Hands-on with Agile workflows, unit testing, code reviews, and owning store releases end to end. Proven impact: page load cut by over 83% on one product. I thrive on tackling complex projects and delivering clean, scalable code.

WORK EXPERIENCE

Mobile App Developer · Wisal, Algeria · Remote (Freelance)

Apr 2026 – Sep 2026

Wisal — a Quran reading-habit app with daily wurd plans, tadabbur/tafsir content, and social accountability features.

- Built the onboarding flow from scratch — personalised, animated, and fully localised in Arabic, English, and Urdu (Flutter, Riverpod, Go Router).
- Built the community system — group challenges, real-time chat over Socket.IO, and reflection sharing between members.
- Shipped gamification (streaks, tree-growth visualisation, knowledge points) and a Live Activity / Dynamic Island reciter player for iOS.
- Owned the release process end to end — published Wisal to both the Play Store and App Store and managed every subsequent update, including forced updates, account deletion, and iOS auth fixes.

Mobile App Developer · Amaya AG, Algeria · Remote

Nov 2025 – Aug 2026

Agrotech platform — 3 interconnected Flutter apps (Advisor, Farmer, Sales) for farm & land management, built for field use in areas with no internet connection.

- Built the design system from scratch — typography, color, grid, and 40+ reusable components — then used it to redesign 40+ screens across all three apps (visit-report flows, Sales orders/invoices/home, onboarding).
- Built offline-first map navigation (Flutter, BLoC, Freezed) with GeoJSON/MBTiles tile rendering, zoom levels 0–13, Crashlytics error tracking, and unit-tested state flows.
- Led a full redesign of the visit-report module (Flutter + BLoC) — rebuilt GPS/map flows, photo capture with annotations, multi-language localisation, and offline-safe form state handling.
- Added local-first offline data sync (an ordered sync coordinator for field data) and multi-layer caching, cutting page load time from ~10 s to 1–2 s cached.
- Refactored shared logic into independent Dart packages (date_utils, validation_utils, network_utils); led sprint planning, task breakdown, and code reviews in an Agile workflow.

Mobile App Developer · QIRAT, Algeria

Sep 2024 – Oct 2025

Startup building [Sofa](#) — cross-platform video streaming platform (10k+ Play Store downloads).

- Built Sofa across mobile, tablet, and Android TV with tailored layouts, D-pad navigation, Google Cast, subtitles, and adaptive streaming.
- Reduced data load time from 8–10 s to under 1 s (80%+ improvement) via API optimisation and smart caching.
- Converted Figma designs to pixel-perfect Flutter UI; deployed to Play Store using Provider and REST APIs.

Mobile App Developer · MSD Consulting, Algeria · Remote

Dec 2022 – Aug 2025

French team — custom apps for logistics, e-commerce, and job marketplaces.

- Developed [Azougui](#) (grocery, Mauritanian market) with real-time inventory, multi-vendor support, Google & Apple auth — released on [Play Store](#) and [App Store](#).
- Built [Snay3i](#) (job marketplace) with Google Maps, 3-language support (AR/FR/EN), full Firebase suite, and a React/Node.js back-office admin panel.

- Shipped [Mziya](#), [Laffaiire](#), and [Laffaiire-Tech](#); configured Flutter flavors (dev/prod); migrated codebase to Flutter 3.x with null safety.
- Eliminated Stripe platform fees by migrating to Standard accounts; integrated Crashlytics, Remote Config, and Analytics across all apps.

Mobile App Developer · INTAJ Mohtawayat, Algeria

Feb 2024 – Sep 2024

Multinational media company — apps for entertainment, education, and event management.

- Built D-Futures from scratch using Flutter, MVVM, Provider, and REST APIs for full event lifecycle management.
- Improved stability of Smart Panda and Ramadan Awards apps; mentored junior Flutter developers and led code reviews across product and QA teams.

Mobile App Developer · SARL MCI, Algeria

Apr 2023 – Dec 2023

Real estate company — internal app for tender management, product & stock tracking, and workforce coordination.

- Designed and implemented a clean GetX architecture, integrated REST APIs for live inventory data, and set up GitHub version-control workflows for the team.

EDUCATION

Master's in Computer Science & Programming · University Abdelhamid Mehri Constantine 2, Algeria 2016 – 2022

Graduation Project: Autonomous RC Car — self-driving vehicle with path following & obstacle avoidance using Raspberry Pi, ROS, C++, and Lidar/ultrasonic/IR sensor fusion under Linux.

TECHNICAL SKILLS

Core: Flutter, Dart, Firebase, REST APIs, Clean Architecture, BLoC, Riverpod, MVVM, Provider, GetX

Mobile: Android, Kotlin, iOS, Play Store, App Store, Flutter Flavors, Push Notifications, Stripe

Design Sys: Theme Tokens, Design System, Figma-to-Flutter, Custom Animations, Responsive UI

Mapping: Offline Maps, GeoJSON, MBTiles, Google Maps, Offline Sync, Spatial Data, Crashlytics

Media: Google Cast, Android TV, D-pad Navigation, Adaptive Streaming, Live Activities, Socket.IO

Methodology: Agile, Jira, Sprint Planning, Code Review, Unit Testing, CI/CD, Git, GitHub

Other: React, Node.js, Firebase Cloud Functions, Linux, Raspberry Pi, ROS, VS Code, Xcode

LANGUAGES

Arabic (Native) **English** (Advanced) **French** (Beginner)
